

Project 1

HTML / CSS

Objectives

Create a static site with multiple pages

- Work with **HTML**, **CSS** and **Javascript**
- Create **wireframes** and follow them
- Work in teams (teams of 5)
- Put **git** into practice
- Create an adaptive site (*Responsive design and mobile first*)
- Get used to time constraints

Topics

General idea

Site gathering a set of reference resources for web developers

Pages

- Presentation of the site
- A presentation page for each resource
- A glossary of the different tech stacks/languages with a corresponding list of resources
- ...

General idea

A website (blog), showing your cities, and it's monuments with a photographer's eye

Pages

- Presentation of the cities
- Places to see
- People to know
- ...

A site of your choice

General idea

Do you have a great idea?
Let's talk it over and begin!

Pages

- To be defined...

Examples of previous blogs created by students

Anelisy, Sofia and Raquel's first project:

<https://sofiarocha.github.io/Blog-Lisbon/>

Remote Q2 project :

Visit Wroclaw

<https://visitwroclaw.eu/en/>

Requirements

Website

- At least 5 to 6 pages (or sections) with consistent navigation
- Wireframes (to be validated in the beginning)
- Styling consistency across all pages
- Clean and valid code
- Use of royalty-free resources only (Unsplash, pixabay, ...)

GitHub Repository

- Code available on GitHub
- Site hosted by GitHub pages
- Explicit commit messages

Presentation

- Ten minutes per group (presentation + demo + questions)
- Context: customer presentation

End of the project
8 octobre 2021

Total time on the project
~ 3 full days

Questions

Then let's get to work!

Decide on a topic in your groups and then begin the

Design workshop
